Three-year-old plants are the largest and finest it is possible to grow and are guaranteed to produce the maximum number of flowers. Plant liberally of these Roses—the profusion of flowers will more than compensate for the trifling outlay. Everyone can succeed with them.

MARE GOUCHAULT. Growth very vigorous, large elongated clusters of 30 to 40 double flowers, as large as those of Dorothy Perkins, fine light red, passing to bright salmon-pink, produces a great effect. Very early variety.

MARY LOVETT. Another Wichuraiana Hybrid, a cross between a seedling Wichuraiana and Kaiserin Augusta Victoria, and termed a "White Dr. Van Fleet." Very fine.

MARY WALLACE. This is Dr. Van Fleet's masterpiece; blooms two or three times during the summer months. A pillar rose supporting itself on a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at the base of the petals.

MADAME GREGOIRE STAECHELIN (The Spanish Beauty). Today's Wonder Rose. Delicious fragrance—quite rare in hardy climbers. A choice cut flower with tight, long-pointed buds. The color is charming—maroon in bud, carmine to pearly pink as the perfumed petals unfold. This variety has received numerous gold medals. You surely will want this outstanding new rose.

PAUL'S SCARLET CLIMBER. Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climber.

RED DOROTHY PERKINS (Excelsa). Crimson-scarlet pillar rose. Quite hardy in addition to all of its other fine points. The flowers are very double, produced in large trusses. Color intense crimson-maroon, tips of petals tinged scarlet.

SHOWER OF GOLD. The color is a deep golden yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON. Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds attractiveness.

VEILCHENBLAU (The Blue Rose). Large Hydrangea-shaped panicles of tight florets—a prevailing steel-blue in color.

We are fortunate in being able to offer new colors in the Cushion 'Mums this year—and by all means, do not overlook the new golden yellow Cushion variety, Harvest Gold.

DIANTHUS, BLAZING STAR

Dianthus Blazing Star blooms in June like the picture shown above. Can stand some shade. One of the most unique and beautiful plants we have ever seen.

SWEET WIVELSFIELD

New Double Sweet Wivelsfield

A sensational new plant. Double Sweet Wivelsfield is a bold, full flower of varying shades of color, from scarlet to pink. The flowers last much longer in the beds and as a cut flower it is very worth while. The flowers are very sweetly scented. 22c each, 3 for 55c, 2 for \$1.88.

MAINE SUNSHINE CARNATION

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground, or in pots, quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep temperature of forty or fifty degrees at night, and they yield an immense number of flowers with splendid stems, as fine as those sold by florists. If not pinched they will bloom profusely during the summer. Your order is incomplete without some carnations.

Great New Dianthus "Blazing Star"

One of the finest new plants ever introduced for the rockery or perennial border. Hundreds of flaming star-shaped flowers borne on a dwarf bushy plant resembling a pincushion.
